

HCL Domino Volt

Domino Volt makes it possible to build new apps 60-70% faster. Developers and business users with common web development skills can rapidly develop powerful, secure, and enterprise-grade workflow applications. Build web-based data capture forms and workflows using data from excel, multiple data sources, or from scratch.

From new mobile-app capabilities to enterprise authentication and a new low-code app builder called Domino Volt, our at-a-glance guide lays out the technical essentials.
