
Kelros Applications

Kelros provides the largest and most comprehensive suite of ready-to-use applications in Europe that covers CRM, procurement, human resources, customer service and reception administration. We support over 500 customers and approximately 100,000 users in over 15 countries worldwide.

You can select from one of four distinct methodologies to implement the Kelros solutions:

- As immediate, ready-to-use, Notes Domino solutions
- As building blocks for customer tailored development by Kelros
- As building blocks for tailored development delivered jointly by Kelros and your in-house teams
- Buy then build: the open source code is provided as standard to allow you to buy a fully customisable and flexible product, a firm foundation for quickly building your own unique business solutions and rapidly deploying them to your users, while minimising long-term administration and maintenance

Kelros also focuses on developing our business applications for IBM Notes Domino with easy integration with legacy systems (SAP, JD Edwards, Movex etc). By using existing features within Notes Domino, Kelros is able to deliver standard Notes Domino Groupware and collaborative benefits, combined with real-time integration of business critical data.

All Kelros applications (both ready-to-use and bespoke development) are sold with an open design, on an unlimited user, server and copies basis in a single Notes Domino domain.

All applications are available to users via the Notes client and / or a web browser, with views accessible directly in the Notes side bar and / or mobile view web access. All applications are ready for use with IBM Sametime, to allow presence awareness, instant messaging, VoIP calls and instant meetings.

We offer solutions across the following business areas:

- CRM solutions
- Customer service solutions
- Procurement solutions
- Human resources solutions
- Web content management and intranet solutions
- Reception solutions
