

Security Solutions

Kelros works in conjunction with IBM to deliver software solutions that provide an integrated, intelligent approach to security, incorporating security intelligence, analytics and external threat intelligence.

We can help you to build a strong security framework that will help to reduce risk, lower costs and improve service.

Featured IBM security software products from Kelros include:

- Access Management
- IBM QRadar Security Intelligence Platform
- IBM Security AppScan
- IBM Security Network Intrusion Prevention System
- InfoSphere Guardium
- IBM Security zSecure Admin

IBM security services from Kelros

Together, Kelros and IBM offer a portfolio of IT security services to protect organisations against threats while reducing costs and complexity, including:

- Core security capabilities - the IBM security framework provides a more integrated, intelligent approach to security. The application of security intelligence, analytics and external threat intelligence helps organisations to detect, analyse and neutralise threats that point products will always miss
- Cloud security - secure your public, private and hybrid clouds
- Smarter security - new ways of doing business need new, smarter security strategies
- Big data security - protect the competitive advantages residing in your big data stores
- Mobile security - defend your organisation against the growing risks posed by mobile devices
