Kelros Forms

Kelros Forms provides organisations with the ability for both Business Users and IT to set up forms applications in a variety of formats to facilitate interaction with both internal and external stakeholders. This solution enables you to automate business processes previously run as paper based systems and create auditable compliant records.

SIMPLE FORM CREATION
An easy to use, drag-and-drop browser tool allows non technical users to create forms in minutes.

MOBILE
Easily build forms that display perfectly on smartphones, tablets and desktops.

WORKFLOWS
Handle processess within a single platform through a simple workflow engine.

INTEGRATION
Integrate your existing services to allow your customers to build custom components on top of your offerings.

DATA SUMMARIES AND SHEETS
Provided instant graphical and tabular views of captured data, downloadable into spreadsheet of XML formats.

- You can create web form applications quickly using drag and drop tools
- Your business can collect information in a regular and automated way
- Users of all skill levels can set up forms relevant to their role in the organisation
- Companies can react promptly to market demands
- Trends can be easily charted and tracked through instant graphical views

In turn this results in a number of benefits to your business:

- Improved efficiency by reducing time to revenue and customer service
- Reduced costs by eliminating printing, distribution, processing and storage

- Decrease in error rates through automation
- Faster transaction times due to ease of set up
- Minimised impact on the environment enabling green objectives to be achieved through reduction in paper usage

Why Kelros Forms?

As an award winning IBM Premier Business Partner, Kelros has a team of accredited and experienced IT professionals. Kelros Forms can be used at all skill levels, and our team will arrange a Proof of Technology Workshop to demonstrate how you can build and integrate Forms to benefit your organization.

For more information about Kelros Forms or to request a Proof of Technolgy Workshop, please use the **Demo Request Form** or **Contact Us**.
