How to improve communication & collaboration

View our IBM Connections Use Case Matrix

IBM Connections is designed to improve employee communication and collaboration, its core capabilities include:

– Sharing and managing files
– Capturing and sharing knowledge
– Working externally
– Improving task and issue management
– Social learning
– Driving innovation
– Improving quality

IBM Connections is an extremely extensible platform that helps make it easy to integrate with numerous third-party solutions (including Microsoft Office) through the IBM Connections App Catalog.

You can give employees all the content and tools they need in one place, within context, to get their jobs done better and faster, see our use case matrix for specific examples: Kelros – Connections Use Case Matrix
